

The background of the poster is a vibrant space scene. At the top, a large, dark blue planet with white clouds is partially visible. Below it, a bright sun or star with a lens flare effect shines in the upper right. The lower half of the image is filled with a colorful nebula, showing shades of red, blue, and purple. The overall background is a deep black space filled with numerous small, bright stars.

**Heights High School**

Invites you to attend

# **Astronomy Night**

**Tuesday, October 28**

**7:30 - 9:30 pm**

Join us for this free event as we look at the night skies! We will locate constellations and planets, as well as look at things such as nebulas, stars and our moon through telescopes. Hot drinks will be served.

**Special Guests:**

**Greg Novacek**

**Director of Lake Afton Observatory  
and**

**The Kansas Astronomical Observers**

**Location:**

**Heights High School, 5301 N. Hillside, Wichita**

**Everyone Welcome!**
