

Join us as we wonder, "Do people in Asia see the same constellations we do?" Information on ancient Asian astronomy from China, Korea, and Japan, complete with illustrations of their versions of constellations and mythology. The night will end with a spectacular star show to help teach how to point out these new constellations in the night sky and telescopic observing of Saturn!

We will be collecting canned and non perishable foods to donate to our local food bank for those in need in our community.

For more information please visit our website at:

<http://cost.georgiasouthern.edu/planetarium> or call the Department of Physics at 912-478-5292.

Directions: The planetarium is located in the Math/Physics Bldg (#203) on the campus of Georgia Southern University in Statesboro, Georgia. Turn on to Herty Drive from Hwy 67/Fair Rd and follow all the way to the end. Turn left through the open parking gate then right into the large faculty/staff parking lot. Walk back down towards the parking gates and the planetarium is across on the other side between the Eidson House-Honors (former Alumni House) and the Biology Bldg. Campus map at: <http://www.georgiasouthern.edu/map/>
