Telescope Clinic

Learn how to use your telescope at the Telescope Clinic. Bring your telescope and all it's pieces to the park on May 10th between 3pm and 5pm and we'll show you how to set it up and use it. Then bring it to our Dark Site Observing Event the following weekend as described at right.

Dark Site Observing

You're invited! On Saturday, May 17th, we're holding a dark site observing session at one of our dark sites. Come see the stars shine! Details, including a map, will be available on May 10th at Brandi Fenton Memorial Park, or call 520-792-6414
