

The **PowerPoint “SUPERNOVA!”** and its suggested script are found in this “PowerPoint” folder.

The suggested script is in the file “SupernovaPPTScript.doc” and as a PDF: “SupernovaPPTScript.pdf”.

There are **two versions of the PowerPoint:**

- Best on PCs (Windows): SupernovaPC.ppt (80MB)
- Best on Mac Computers: SupernovaMac.ppt (20MB)

If you do not have Microsoft PowerPoint installed on your computer, and you are using the Windows operating system, you may download the **PowerPoint Viewer**. Go to the [Microsoft Office Web site](#), follow the Microsoft PowerPoint links that direct you to downloads, click to download the viewer, and follow the instructions for installing.

The movie used in the PowerPoint on slide number 11 is also in this folder. There are two versions: one for Windows Media Player: ***classic\_supernovaWin.wmv***, and one for QuickTime: ***classic\_supernovaQT.mov***.

If you have a problem running the movie in the PowerPoint, you can run it separately. You will need **Windows Media Player** or **QuickTime Player** to play the movie.
